## EDUCATION

The diplomas below are the equivalents of the French diploma that I acquired.

**SEPTEMBER 2021**

**BACHELOR'S DEGREE IN RENEWABLE ENERGY, IUT\* of Tarbes (65 FRANCE)**

This diploma allows acquiring essential skills in the design and study of the thermal envelope of buildings, covering aspects such as thermal regulations, construction techniques, and thermal properties of materials. It also provides training in the study and integration of renewable energy sources necessary to meet the energy needs of buildings.

**JUNE 2020**

**HIGHER NATIONAL DIPLOMA IN ENERGY, CFA\*\* of 13 Vents, Tulle (19 FRANCE)**

This diploma provides training in essential skills related to the study and installation of fluid systems, including hydraulics, refrigeration, and ventilation. This also includes technologies such as heat pumps, solar panels, photovoltaics, and the Canadian well.

**JULY 2018**

**BTEC NATIONAL DIPLOMA IN ELECTRICITY, CFA\*\* of 13 Vents, Tulle (19 FRANCE)**

This diploma deepens electrical skills, covering very low voltage (electronics), high voltage, programming of communicating devices (KNX, TX100, My Home), electrical energy management, and the rigorous application of safety standards.

**JUNE 2017**

**ELECTRICIAN CERTIFICATE, CFA\*\* of 13 Vents, Tulle (19)**

This diploma is an electrical training program that covers a wide range of essential skills, including low voltage, interpretation of electrical diagrams, installation of electrical components, wiring, electrical maintenance, as well as strict compliance with safety standards.
